

**A week for all innovative minds and designers of the energy future.
So that energy innovation may succeed.**

For the fundamental transformation of the energy system into an efficient and climate-neutral energy, mobility and economic system as well as a clean, secure and affordable energy supply for all people to succeed, completely new partnerships and alliances must be created. Actors from research, industry, politics and local communities, as well as end-users, must work together across sectors and industries.

With the Mission Innovation Austria Week, the Federal Ministry of Transport, Innovation and Technology and the Climate and Energy Fund are once again providing a forum for all those actors who play an active role in shaping the change process of the energy system by developing and implementing new technologies and solutions.

**Save the Date:
Mission Innovation Austria Week
20. - 24. of April 2020
Hall & Innsbruck
Tirol**

With the Tyrol location agency and Energie Tirol, the best connected and renowned regional partners could be won for 2020, with whom it will be possible to highlight the special challenges in western Austria and develop joint solutions for the Alpine region. ^

Highlights at the Mission Innovation Austria Week 2020

- Historical, unique and inspiring premises of the salt warehouse Hall and the adjacent castle Hasegg
- Interactive formats, sessions for networking & personal exchange, inspiring lectures
- the program is developed in advance through an intensive and public co-creation process.
- Exchange of experience and knowledge with innovation & technology leaders, actors from test regions & pilot projects
- Presentation of proven energy technologies for the world market - from Austria, Europe & international
- Supply meets demand, challenges meet solutions: Networking with potential partners at national and international level
- Information about current trends & developments as well as insights into progress & results of energy research & technology development - on european and global level.
- Points of contact with funding programmes, concrete identification of research needs

ABOUT MISSION INNOVATION AUSTRIA WEEK

Mission Innovation Austria Week, or MIA for short, is the annual forum for all designers and innovators of the energy systems of the future. Due to the close cooperation of the Federal Ministry of Transport, Innovation and Technology with international and European networks as well as the most important domestic companies and institutions, it is possible that leading personalities from numerous disciplines, sectors and industries meet at the MIA. Together they work on solutions, ask questions, point out needs, share knowledge and experience, present successful projects, formulate demands, network and exchange.

The MIA is an important part of the initiative Mission Innovation Austria - Austria's contribution to the worldwide research alliance Mission Innovation (MI). The global initiative Mission Innovation was founded in 2015 and now consists of 24 states and the European Union. Its declared aim is to promote the development of clean energy technologies through private and public investments.

Austria's participation in international research cooperations makes it possible to advance the development and implementation of energy innovations in and from Austria. With the support of the Federal Ministry of Transport, Innovation and Technology, the technologies and solutions of domestic players are actively introduced into international cooperation as pioneers for the energy future and Austria is positioned among the international leaders.
